

BMSE2073 SYSTEM DESIGN AND ARCHITECTURE
ASSIGNMENT RUBRIC (202500)

ASSESED CLO : CLO3 - Construct the software architecture for a project scenario. (P4, PLO3)

TUTORIAL GROUP	STUDENT NAME / ASSIGNED MODULE	MARKS	REMARKS / NOTES
S1		0.00	
S2		0.00	
S3		0.00	
S4		0.00	
S5		0.00	

NOTE : EDIT THE AWARDED POINT COLUMN ONLY

SECTION	AREA	WEIGHTAGE	EXCELLENT (9 - 10)	GOOD (6 - 8)	SATISFACTORY (4 - 5)	BELOW AVERAGE (2 - 3)	POOR (0 - 1)	AWARDED POINT	STUDENT				
									S1	S2	S3	S4	S4
Initial Design (Group)	The complete software architecture	15	Very good implementation of architectural patterns that shows high-level modular structure Very good definition of the responsibility of each module and relationship between module	Good implementation of architectural patterns that shows high-level modular structure Good definition of the responsibility of each module and relationship between module	Acceptable implementation of architectural patterns that shows high-level modular structure Acceptable definition of the responsibility of each module and relationship between module	Poor implementation of architectural pattern Poor definition of the responsibility of each module and relationship between module	Very poor implementation of architectural patterns Very poor definition of the responsibility of each module and relationship between module		0.00				
	Design rationale for constructed architecture	20	The selected QAs are highly relevant to the project and supported by examples of scenarios where the QAs is required. Very good and detailed final architecture justification. The justification clearly demonstrates how the pattern(s) enable the project's Quality Attributes.	The selected QAs are relevant to the project and supported by examples of scenarios where the QAs is required. Good final architecture justification. The justification demonstrates how the pattern(s) enable the project's Quality Attributes.	The selected QAs for the project are acceptable, BUT lack scenarios where the QAs are required. Acceptable final architecture justification. BUT lacking on how the pattern(s) enable the project's Quality Attributes.	The selected QAs are not relevant to the project. Little attempt to provide justification and elaboration on the final selected architecture OR The explanation provided has major inaccurate, irrelevant and rebuttable points	The selected QAs are not relevant to the project. Very little attempt to provide justification and elaboration on the final selected architecture OR The explanation provided is totally inaccurate, irrelevant and rebuttable.		0.00				
Detailed Design (Individual)	Construction of activity diagram for the assigned module	15	Very good and detailed activity diagram which shows the module's responsibility Comply to syntax and semantic of UML diagram	Good activity diagram which shows the module's responsibility Comply to syntax and semantic of UML diagram	Generally good activity diagram which shows the module's responsibility Has minor syntax and semantic errors	Little attempt was made to construct the activity diagram Has syntax and semantic errors	Little attempt was made to construct the activity diagram Has major syntax and semantic errors		0.00

											0.00		
												0.00	
													0.00
	Implementation of design pattern in class diagram for the assigned module	10	Very good implementation of class diagram using the selected design patterns, which represent all functionalities in the module	Good implementation of class diagram using the selected design patterns, which represent functionalities in the module	Acceptable implementation of class diagram using the selected design patterns, which represent functionalities in the module	Poor implementation of class diagram using the selected design patterns, which may not represent functionalities in the module	Very poor implementation of class diagram, and does not represent functionalities in the module		0.00				
										0.00			
											0.00		
												0.00	
													0.00
	Design rationale for the selected design pattern	10	The selected design pattern is very suitable Very good and detailed justification that discusses how the pattern solves the specific problem in the class design for the module.	The selected design pattern is suitable. Good justification that discusses how the pattern addresses the specific problem in the class design for the module.	The selected design pattern is acceptable. Acceptable justification, but does not clearly discuss how the pattern addresses the specific problem in the class design for the module.	The selected design pattern is not acceptable. Acceptable attempt to justify the selection, but rebuttable..	The selected design pattern is not acceptable. Very week justification		0.00

												0.00	
													0.00
Human Interface Interaction (Group)	Construction of GUI for the project	15	Very well designed/developed GUI stacks	Well designed/developed GUI stacks	Shows attempt to develop the GUI stacks. However there are inconsistency in the overall look and feel	Inadequate attempt to develop the GUI stack	Very little attempt to develop the GUI stack		0.00				

ASSIGNMENT RUBRIC (202500)

Software Design Document (Group)	Structure, content and organization	10	Very good structure & content of SDD	Good structure & content of SDD	Shows attempts to prepare SDD However some errors/omissions on structure/contents. Lack elaboration on some points	Poorly prepared SDD	Incomplete and very little attempt to prepare SDD		0.00				
Project Commitment (Individual)	Individual commitment towards the completion of the project	5	Very motivated and self-driven in contributing ideas and opinions to develop and complete the project. Showed significant progress in every practical and discussion session	Highly motivated and self-driven in contributing ideas and opinions to develop and complete the project. Showed commendable progress in every practical and discussion session.	Generally motivated and self-driven in contributing ideas and opinions to develop and complete the project. Showed acceptable progress in every practical and discussion session	Less motivated and self-driven in contributing ideas and opinions to develop and complete the project. Showed small progress in every practical and discussion session	Least motivated and self-driven in contributing ideas and opinions to develop and complete the project. Showed very small progress in every practical and discussion session		0.00
