INTRODUCTION

It is the requirement from Ministry of Education that all Malaysian and non-Malaysian students to complete the General Studies (MPU – Mata Pelajaran Pengajian Umum) as pre-requisite for the award of an undergraduate degree. This assignment is a partial fulfillment of the stated requirement for an undergraduate taking the subject in Entrepreneurship. This assignment is divided into 3 parts which are idea generation, business plan and student pitching.

OBJECTIVES

The objectives of this assignment are to assess student's ability to:

1. **Understand** the different methods of ideas generation and **apply** in creating a transformational business. (C2, PLO2)
2. **Describe** the critical functional areas and **present** in a well-written business plan by gathering related materials through the available sources. (A1, PLO10)
3. **Propose** the new venture idea and business plan to potential financiers and/or investors. (A3, PLO11)

LATE SUBMISSION

All assignments should be submitted by the stated due date unless as revised and approved by the lecturer. It is the responsibility of the students to ensure that the assignment is substantially prepared prior to the submission date. As a general rule of thumb, no extension of time will be granted. The assignments and its due dates are normally given in advanced to students so that they have ample time to organize their study program. Please refer to **TARUMT Guideline of Late Submission Coursework**.

ASSIGNMENT POLICY

All works presented for assessment are expected to be the student's own and original work. The lecturer expects of all students, honest and meticulous acknowledgement of all sources of materials used.

PLAGIARISM

All work submitted must be original and not previously submitted for assessment at this University College or elsewhere. All information from other sources must be duly acknowledged. In particular, you need to cite (by using **American Psychological Association or APA Style**) sources discovered on the Internet or any other publications. Plagiarism is a breach of the University College regulations and may result in a mark of zero being given for the work containing plagiarism. Plagiarism includes copying from another source without acknowledging that source, whether it can be the work of another student, an author or of your own assignment for another course. Students found to have plagiarised other works will record a failure in the subject.

Given the explosion of electronic publications in recent years, students need to be careful that their assignments do not become an exercise in cutting and pasting existing abstracts or portions of World Wide Web pages. Rarely will such an approach produce acceptable results.

The student is required to submit the report to **Turnitin** to check for plagiarism. If the plagiarised percentage is more than the acceptable percentage, the student has to modify the assignment report until it is below the acceptable percentage before submission otherwise it will be considered as a plagiarised material. Remember to attach along the report (**the first page only**) generated by Turnitin software as a proof of your originality work.

QUESTION:**4.4% GDP growth in first quarter 2025 fortifies Malaysia's fundamentals in the face of Global uncertainties**

A rousing performance across key economic sectors lifted Malaysia's Gross Domestic Product (GDP) by 4.4% in the first quarter of 2025 (Q1 2025), in line with the GDP Advance Estimates and higher than the 4.2% growth recorded in the corresponding quarter of 2024 (Q1 2024).

The GDP growth in Q1 2025 was buoyed by the Services (5%), Manufacturing (4.1%), and Construction (14.2%) sectors. Further fuelling the growth momentum was stronger consumer spending during the Chinese New Year and pre-Hari Raya festive periods, the implementation of the new minimum wage in February 2025, and the recent increase in civil servant salaries.

"Private consumption, undergirding Malaysia's economy, grew 5% in Q1 2025. This was supported by encouraging labour market performance with a decline in the unemployment rate to 3.1% and benign inflation at 1.5% — both marking the lowest levels recorded under the MADANI administration," said Finance Minister II YB Senator Datuk Seri Amir Hamzah Azizan.

This is compared to the performance in Q1 2024 where private consumption rose by 4.7%, while the unemployment rate stood at 3.3% and inflation registered at 1.7%.

"Investments continued their growth momentum in Q1 2025, recording a 9.7% increase — reflecting the positive response from global investors to the MADANI Government's pro-development policies and strong emphasis on sustainability, as outlined in the National Energy Transition Roadmap (NETR), New Industrial Master Plan (NIMP) 2030, National Semiconductor Strategy (NSS), and other key national policy frameworks," he added.

The Government is also actively working to attract more high-quality foreign direct investment (FDI) to stimulate growth, while maintaining a dynamic ecosystem — after recording the decade-high domestic investment in 2024.

Neutral positioning and an accelerated reform agenda form strong defence against rising global uncertainty

At the same time, the Government acknowledges the presence of downside risks to the official 2025 GDP growth forecast of 4.5% to 5.5%, owing to tapering global demand, heightened geopolitical tensions, and the rising prevalence of protectionist trade policies — particularly the recent announcement of reciprocal tariffs by the United States of America (US).

The Government will work to accelerate the implementation of the Ekonomi MADANI reform agenda, focusing on fiscal sustainability, strengthening Malaysia's economic value chains, protecting the welfare of the broader population through social safety nets, and unlocking the potential of the local talent pool.

In addition, the MADANI Government will continue to closely monitor both domestic and global economic developments, and is prepared to implement responsive and appropriate policy measures to ensure that Malaysia's economic growth remains consistent, sustainable, and inclusive — for the well-being of all segments of society. The Government remains committed to maintaining investor confidence and protecting domestic industries amid an increasingly complex global economic landscape.
