

BMSE1003 Software Engineering - Group Assignment Rubrics (CLO3)

Student Names:	(1)			
	(2)			
	(3)			
	(4)			
	(5)			

Section	Criteria / Area	Excellent	Good
	Organization background	Very detail elaboration on introducing background of the chosen organization. (5m)	Good elaboration on introducing background of the chosen organization. (4m)
Part 1	Problems of existing/legacy system	Very good elaboration on problems of existing/ legacy system with mximum findings (9m-10m)	Good elaboration on problems of existing/ legacy system with findings but it can be improved further (6m-8m)
	software quality attributes	Very good elaboration on quality attributes with maximum findings (8m-10m)	Good elaboration on the quality attributes but it can be improved (6m-7m)
	Lecturer comments		
	Total 25		
	Criteria / Area	Excellent	Good

Tutorial Group:					/80				
Programme:	R (	)		Report					
				presenatation	/20				

Average		Poor		Very Poor		Score			
Generally show attempt on introducing background of the chosen organization with minimum findings	(3m)	some important information is missing in the elaboration ..	(2m)	very poor findings of organisation background	(1m)				
Generally show attempt on providing elaboration on problems of existing/ legacy system with 3 findings	(4m-5m)	provide elaboration on problems of existing/ legacy system with 2 findings	(2m-3m)	provide elaboration on problems of existing/ legacy system with 1 finding.	(1m-)				
Generally find the quality attributes with limited elobration and findings	(4m-5m)	provide elaboration on problems only for 2 quality attributes findings	(2m-3m)	only 1 findings on quality attributes .	(1m)				

Average	Poor	Very Poor	Score			
			(1)	(2)	(3)	(4)

(5)

	Suggested Software Process Model	provide very clear justification , illustration and elaboration on suggested process model.	(8m-10m)	Good justification and elaboration on suggested process model but it can be improved further	(6-7m)
PART 2	System Requirements*	Very good defined, structured and organised functional requirements for the new system with maximum requirement	(8-10m)	good defined, structured and organised functional requirements for the new system maximum requirement but it can be improved further.	(5-7m)
	Viewpoint hierarchy	Very good findings of 5 maximum viewpoint hierarchy with and excellent in justifying the roles/importance of each viewpoint involved	(8m-10m)	Good defined viewpoint hierarchy with almost all necessary viewpoints involved and good in justifying the roles/importance of each viewpoint involved. but it can be improved further.	(5m-7m)
	TOTAL (30 marks)				
	Lecturer comments				
	Criteria / Area	Excellent		Good	
Part 3	Suggested System architectural design	Very good justification and detailed elaboration with examples /scenarios on suggested system organisation model.	(8m-10m)	Good justification and elaboration on suggested system organisation model, yet still need improvement in the findings	(5m-7m)

provided limited justification on suggested process model.	(4m-5m)	Provided answers poorly met the details of the software process model	(2m-3m)	Very poor attempt to provide justification and elaboration on suggested process model.	(1m)				
Provided limited functional requirement that basically met the details of the criteria	(3-4m)	poor attempt to identify the functional requirements for the new system.	(2m)	Very poor attempt to identify the functional requirements for the new system.	(1m)				
Average viewpoint hierarchy (3) with partial viewpoints involved and in justifying the roles/importance of each viewpoint involved.	(3m-4m)	Inadequate attempt to prepare viewpoint hierarchy (2) with some inadequate viewpoints involved and weak in justifying the roles/importance of each viewpoint involved.	(2m)	Very little attempt to prepare viewpoint hierarchy (1) with some irrelevant viewpoints involved and weak in justifying the roles/importance of each viewpoint involved.	(1m)				

Average		Poor		Very Poor		Score			
Generally good on providing justification but need to improve in and elaboration on the suggested system organisation model	(3m-4m)	Little attempt to provide (2) justification and elaboration on the suggested system organisation model.	(2m)	Very poor attempt to provide (1) justification and elaboration on the suggested system organisation model.	(1m)				

[illegible]

	Screen Design Principles & Justification	Very clear elaboration of (5) UI design principles used .	(8-10m)	Good elaboration of UI design principles used yet still need to be improved further	(5-7m)
	Assignment format	clear structure & headings, consistent formatting, very good grammar and Referencing.	(5m)	Good structure and yet still need to be improved further in formatting , grammar and referencing	(4m)
	TOTAL (25 marks)				
	Lecturer comments				

Generally show attempt on suggesting UI design principles but lack of ellobration	(3-4m)	Poor findings on UI design principles (2) and explanation.	(2m)	Very poor findings only (1) UI design principle and explanation	(1m)				
lack of strucrure ,Minor formatting inconsistencies, grammer and referencing are still weak	(3m)	Incomplete structure,Noticeable grammar and referencing issues	(2m)	poor structure, poor formatting, poor grammer, no referencing	(1m)				

BMSE1003 Software Engineering - Individual Presentation Rubric (CLO3)

Programme:	R ()	Student Names:	(1)	(2)
Group:				
			Rating: 1-Very Poor, 2-Poor, 3-Average, 4-Good, 5-Excellent	Rating: 1-Very Poor, 2-Poor, 3-Average, 4-Good, 5-Excellent
Section	Criteria/Area	Very Poor		
Oral Presentation	Ability to deliver ideas clearly, effectively and confidently use of visual aids and tools for effective presentation .	Delivery of ideas is vague, unorganised and without confidence.	1 2 3 4 5	1 2 3 4 5
	Ability to answer the question and provides justification.	Unable to answer the question & not understanding	1 2 3 4 5	1 2 3 4 5
	Presentation skill	Inaudible,no eye contact, speaker seemed uninterested and used monotone	1 2 3 4 5	1 2 3 4 5
	Able to use of visual aids and tools for effective presentation	Not prepare presentation slides and no visual aids used	1 2 3 4 5	1 2 3 4 5
TOTAL (20 marks)			/20	/20
Comments:
